Category: First If you have a successful blog like me, the links you get through Google are typically a mix of people recommending your blog, a list of past posts that you have linked to, and sometimes you even get blogroll links to similar or related blogs. The first links you get on a Google

search are the most important for your blog. It is where most of your traffic will start, which means it is where you want to get links to. Yesterday, I was searching for a recommended baby formula and thought that I might try feeding my daughter some of her Formula East milk. The links to her website that came up were for unrelated sites. I found this link here at Feeding the Family. The site is pretty new, and the top three blogs at the moment are from the same person. One is for the personal growth and inspiration blog, but I found that the others

---

are from a mom who homeschools and posts about cooking and other lifestyle topics. I am not linking to her site, because I know that I will not gain any more links from her. However, if you are looking for a good website to link to, go to her homepage and see what she is all about. Not so long ago, I was asked by a reader of my blog to recommend a style of bra that she could wear under a strapless dress. She wanted to show off her spectacular back, and I guess the dress was an heirloom and was too special to be

underwearing. So, I asked my readers for some good tips, and here is what they sent me. As I was searching for information about buying a home, I realized that

#### What's New In AutoCAD?

The AutoCAD community has shared feedback, and now you can share your feedback in a few clicks. The new Markup Import feature allows you to import comments directly from paper or a PDF. The feature also takes the guesswork out of applying changes by automatically incorporating

---

those comments into your drawing. Quick Edit: If you try to merge a line into a textbox, a new prompt will ask if you want to perform a “real merge” or “quick edit.” Quick Edit automatically updates the textbox and/or the basepath, just like it does when you type. The only difference is it will not prompt for a move/rotate. This is the most common action we see users do when they think they have made changes. By using the Quick Edit feature, you can rest assured your drawing changes will always be accurate and up to date. Smart

Project: When you start a project, the project status is displayed next to the taskbar: “Tasks available.” You can start a new task or start a task in progress. The Smart Project feature will alert you when the new drawing or sheet is completed. You can then download it to your drive. The Create project features include automatic preview, which means you can see exactly what you will be working on without leaving the drawing. You can also create a new drawing, view a template, or change the document properties. The new

---

AutoCAD 2023 app (or your app of choice) saves you from having to use the Draw and Undo dialogs to change project properties. The new app is smart and suggests a default or compatible setting. App-Specific improvements:

Eclipse: New as of AutoCAD 2023: AutoCAD now ships with an Eclipse application that allows you to run your drawing in Eclipse. You can also import Eclipse projects and save out to other file formats.

PowerPoint: New as of AutoCAD 2023: You can now save your drawing to PowerPoint files. The data is

---

sent directly from the drawing to PowerPoint, so you can work with a faster turnaround time.

The new option is found in the Save menu (Ctrl+S). 3D: New as of AutoCAD 2023: 3D
