There have been some complaints about some of the buttons not working properly. Excessive traffic is prevalent and expected but when there is a crash it is noted that officials cannot discern the vehicle's identity, and are forced to search for drivers through a book of drivers, causing long waits for a suitable operator. For example, it is possible to be dispatched in the middle of the night to help a trucker whose truck has overheated, making it difficult to find a trucker with open spaces in his or her schedule. A presentation he made to the American Association of Port Authorities in 2004 concluded that more modern highway construction methods, including raising the maximum allowed speed limit, extending highway hours of service regulations, and mass transit approaches could reduce truck traffic by making it easier for truckers to switch to more efficient road systems. Van Emmerik points to a study by the Organisation for Economic Co-operation and Development (OECD) that found that the number of trucks plying the nation's roads grew by about 13 percent between and although the growth rate remained relatively steady, from to 44 million trucks were registered in the U. Vehicle Transport - Transport Manager An analysis of the truck transportation industry found that trucking companies generally profit when freight prices fall, while shippers suffer from the rising cost of transportation. On a typical route, a truck operator is expected to spend about per day. There are often disputes over whether or not a driver is properly licensed and insured. The government has created agencies to address some of the concerns of truckers, such as the Federal Motor Carrier Safety Administration, which is responsible for vehicle registration and licensing, and the Occupational Safety and Health Administration, which is responsible for safety. In addition, the transport industry is working with the Federal Transit Administration to eliminate the problem of "pinch points" that are transit hubs at which drivers are often blocked in when transferring to another vehicle. To minimize traffic congestion, it is important that truck drivers use the most efficient routes available and coordinate their activities to minimize the amount of driving time that is wasted waiting for traffic to clear. This is particularly important when switching from one highway to another, where there is a short "dip" 82138339de
