eDownloader is a lightweight application whose purpose is to help users download files from the Internet. It sports a clean and simplistic layout pointing out the fact that the accent of the program doesn't fall upon its looks but rather on its functionality. eDownloader gives you the possibility to insert the URL in a dedicated panel and start the downloading process with just one click. What's more, the program is able to save the downloading history for facilitating the retrieving process of lost downloads. This means that you can grab files and save them on the computer in an offline mode. Since it doesn't require much computer knowledge to work with this tool, even less experienced users can set up the dedicated parameters with minimum effort. During our testing we have noticed that eDownloader carries out a task quickly, and no errors showed up throughout the entire process. As it would be expected from such a small utility, it remains light on system resources, so it doesn't burden the overall performance of the computer, nor interfere with other programs' functionality. To sum things up, eDownloader offers a simple software solution when it comes to helping download files. It can be easily installed and configured by all types of users, regardless of their experience level. However, it cannot compete with other powerful tools on the market, as it doesn't offer support for advanced functions, such as scheduled tasks, filters, and a user-defined number of maximum downloads, just to name a few suggestions. eDownloader 2.8.5 [center]Latest version: 2.8.5 | File size: 143.66 MB * Added: move "eDownloader -> PC" function to the context menu. * Added: possibility to select between "advanced" and "custom" tabs * Fixed: computer name, IP address and port number are displayed in the context menu, when eDownloader is installed on a USB stick * Fixed: remove "eDownloader -> PC" action if the download URL is not selected in the "Include URL list" section * Fixed: when the "Pressing on OK" window is closed, eDownloader doesn't remember the last selected file * Fixed: when the downloading is interrupted and the PC is disconnected, the download remains stored in the eDownloader database * Fixed: when the PC is disconnected the eDownloader dialog box is shown * Fixed: when the
