Q: Is WebDriver (or similar) capable of polling pages without webdriver/Selenium/Java/PHP? I am working on an application that uses webdriver to navigate a server. I'd like to be able to switch to a different server and then poll for changes without losing the driver's session. I can imagine implementing a stateful driver like Watir or Selenium which polls a page, hands off control to the next page when it loads, then says "ok, load new page. Otherwise wait 'x' secs, then repeat". But that's just a guess and I'm wondering if there's a framework that's already doing this. A: Just running a series of selenium tests would be a poor
