Download ISumsoft ZIP Password Refixer 3.1.1 plus Keygen..Q: How do I select multiple rows of an Azure Data Factory and import all of the rows into multiple tables in SQL Server? I am relatively new to data factory and am trying to select one row in one data table and then create a new table that links that row to another table. Data: | Table1 | Table2 || || Table1RowA | Table2RowA | | Table1RowB | Table2RowB | | Table1RowC | Table2RowC | So when I get data from Table1, I want to import all of the rows in Table2. My goal is to do this for each Table1 row. Table1 is an Azure Table Storage table, and Table2 is a SQL Server table. The code looks like this: { "name": "Default Activity", "type": "Foreach", "label": "Table1", "typeProperties": { "source": { "type": "BlobSource", "folderPath": "sourceFolder" }, "records": [ { "name": "Table1RowA"
